

Dear Neighbor,

I am writing to introduce you to ACCIONA Energy and let you know about plans for the Palmas Altas Wind Farm that will be located in the vicinity of Rio Hondo - a map of the project area is included in this letter. Our experienced team will be managing the project in a way that minimizes impacts on nearby residents, but you may notice activity near the project site when construction begins. Currently our permitting and development work is on track to begin construction around September 2018, and finish around November 2019.

You may recognize our name because we are the owner operators of the San Roman wind farm.

Palmas Altas will consist of 46 wind turbines located on private land. When completed, the wind farm will generate enough clean, renewable electricity to power over 43,000 homes. ACCIONA Energy will build, own and operate the wind farm.

We will keep you updated on the progress of the project and you can always contact us through the email address below. We have also established a project website at www.palmaswind.com to make sure community members can get in touch and stay up to date on our progress.

ACCIONA Energy has constructed over 200 wind farms around the world. We work hard to be a good neighbor during the construction and operation of our projects. We will employ as many as 170 people during the peak of construction and once complete, the project will be operated by a staff of 10 people.

Planning for the Palmas Altas Wind Farm included extensive wildlife and environmental studies to determine if the site was appropriate for wind farm development. All of our construction contractors will adhere to our strict safety and environmental requirements to ensure that the project is a success.

ACCIONA Energy is proud to be part of the business community in Cameron County. We first came to the county to build San Roman, which is located near Los Fresnos. Our local team has been operating the San Roman since 2016, generating homegrown electricity and bringing new revenue to the county.

When we built San Roman, we established the San Roman Wind Farm Scholarship Fund, which will provide scholarships to students from the Port Isabel and Los Fresnos School districts throughout the life of that project. For Palmas Altas, we will be making significant road improvements to Olmito Road and to Fernando East Road near the intersection with Olmito Road. We have also come to an agreement with Cameron County to fund a two-year road fund for other

road improvements. We're looking forward to creating more jobs and economic growth here in Cameron County.

If you have any questions or concerns, please contact us via email at **palmasinquiries@acciona.com**.

Sincerely,

Mary Connor, Environmental Manager
Acciona Energy USA Global LLC
